

## New Rheumatology Referrals Email Process

Dear All Primary Care Colleagues,

The L&D's rheumatology department has now switched from the unreliable and unsafe mode of receiving faxed referrals and enquiries, to the use of the secure nhs.net email address detailed below.

[ldh-tr.rheumatology@nhs.net](mailto:ldh-tr.rheumatology@nhs.net)

All referrals, enquiries and communications for the Rheumatology department should now come through this dedicated email address, which is checked frequently during the day by the department secretaries, with cover for annual leave, to ensure that messages are never missed. We are sure that you will find this a much more convenient and reliable means of communicating with us.
